Includes a collection of my works.

Skills

- Figma + Figma Make
Prototyping
Design Systems
Wireframing
InDesign
Photoshop

Programming
Languages

HTML
CSS
JavaScript
(basic front-end development)

Methodology

- User Research
Usability Testing,
Information Architecture
Interaction Design
Accessibility
Heuristic Evaluation

About me

UX Designer with experience designing large-scale digital platforms (MOSIP, DIGIT), specializing in complex workflows, AI systems, and user research. Published researcher at **ACM CHI (A)** focusing on trust and transparency in RAG-based systems.

HCI Research Experience

Transparency for Retrieval Augmented Generation (RAG)-based Application [GenAI]

- Conducted user research to understand user trust factors and improve UX in RAG-based applications.
- Designed features enabling transparency and user control in RAG-based systems, including query branching and document-level interaction flows.**
- Published research at **ACM CHI 2025 (CORE A)**, on trust and transparency in Retrieval-Augmented Generation (RAG) systems for domain experts.

Transparency conditions for AI Agents [GenAI]

- Conducted user research on user understanding, verifiability and interactions under different conditions of transparency.

[Skills: User testing, User study design , Wireframing, Lo-Fi and Hi-Fi Figma prototyping]

Professional Experience

UX Designer

Infosys Technologies Limited | March 2025 – Present
STG (Strategic Technology Group)

- Designed end-to-end workflows and high-fidelity interfaces for a **national-scale pension platform**, improving **task completion** rates and reducing user friction across complex journeys.
- Collaborated with cross-functional teams (**product, engineering**) to translate requirements into **scalable UX solutions**, ensuring consistency across multiple modules and user flows.
- Led **UX research** and **early design exploration** for a government IP platform, improving clarity and **structure of patent filing** workflows for diverse user groups.
- Improved usability for the **DIGIT 3.0 platform**, supporting government services across multiple states and large-scale user groups.

Coursera Certifications

Google UX Design
Specialization

Generative AI :

AI for Everyone
Generative AI for Everyone

- Worked on **MOSIP (Modular Open Source Identity Platform)**, designing user flows for identity enrolment and verification in **large-scale systems**(used by multiple countries).
- Conducted **usability testing and user research** to inform design decisions and improve **user experience outcomes**.

[Skills: User research, Lo-Fi and Hi-Fi prototyping, Wireframing, Design systems]

Education

Master of Interaction Design and Electronic Arts |

The University of Sydney | Feb 2023 - August 2024 | Distinction (7.9)

- Focus: Interface Design, Product Design, and Usability Engineering
- Technical Skills: Front-end Development (HTML, CSS, JavaScript) and Object-Oriented Programming, Design Thinking, Prototyping, User Research. ([Transcript](#))

Bachelor of Architecture |

R.V College of Architecture | August 2017 - June 2022 | Bangalore, India

- Accredited Architect with project management experience and a focus on integrating aesthetics, functionality, and sustainability.
- Internship at BNA (Balan and Nambisan Architects) working with project leads ensuring alignment with client requirements.

Academic Projects

Beach Safe – partnered with Surf Life Saving [Unit: Graduation Studio]

- Designed a mobile app to improve beach safety using location-aware interactions, simplified emergency workflows, and clear risk communication
- Focused on helping users make faster and safer decisions in high-risk situations

- **Selected as a standout project among 30+ submissions and showcased at the 2024 USYD ADP Graduate Exhibition**

[Skills: User-centered design, Design Thinking, Figma, Prototyping, User Testing, Accessibility]

Tin Sheds Gallery Quest [Unit: IDEA Studio 2]

- Designed an interactive experience to improve community engagement using archival materials
- Iterated on concepts through multiple testing methods, including bodystorming and prototyping

[Skills: Storyboarding, Bodystorming, Backcasting, Engagement Design]

Cartoon Encyclopedia [Unit : Web Application Development]

- Built a full-stack, data-driven web application using MongoDB, Express.js, Node.js, and Vue.js
- Developed features for authentication, data management, and CRUD operations

[Skills: Front-end Development, MEXN Stack, Responsive Design, Git]
